Do you want to save money? Buy the third Edition it has the same information, same chapters and the third edition is cheaper.

The best textbook I've had to purchase so far for any class (GEOL-1401 at DCCCD). Easy read. Very to the point and well explained. Beautiful detail. I love all of the photos and diagrams. I'm keeping my copy. (Geosciences geek at heart.)

I bought this book for my son for a college course he was taking. I have an interest in Geology so I

have been reading it when he doesn't need to read it. I really like the visual approach it uses to teach concepts. Good learning tool.

Just as described. Thank You!

This book is excellent for my Geology class, It is very helpfull, also the web page works very good.
The book will be for my 3 Geology classes.

I don't really love any textbook, but this came on time and had beautifully colored pictures.
