Customer Reviews

I think these are the best model kits. They aren't too big and bulky like the other ones out there. The pieces are all organized in nice sections and you even get a manual to help you make molecules. I advise you don't push the "atoms" into the "bonds" too hard or else it'll be difficult to get off. Just gently but securely twist them on.

Good quality, exactly what I expected

Waste of money - very cheap product

Very helpful in class and working problems out out of class
