Customer Reviews

"You may already know your birthstone, but you may be surprised to learn that there are several other stones associated with your birthchart." --from the book
Your natal astrological chart is based on the date, time, and place of your birth. Most people are familiar with their Sun sign, which is one of 12 Zodiac symbols. The placement of the Sun in your chart indicates the pathway your soul is following, and each sign is associated with one or more crystals. Using the gemstones associated with your Sun sign can help attract beneficial energies, balance out less desirable tendencies, overcome your karmic inheritance and connect you to the path of your soul. Each Sun sign is also associated with specific body parts, indicating areas where health challenges may occur.

Birthstones can help with these ailments, as well. While the Sun sign is important, there are two other components of your natal chart that paint the unique portrait that is you: the Moon sign and Ascendant (also known as the Rising Sign). The Moon sign shows how you process and express emotion. Your instinctual nature, unconscious patterns and expectations are also governed by your

Moon Sign. The Ascendant, or Rising Sign, is the "mask" you show to the world. It's the part of your personality that is readily seen to most-a "first impression" if you will. Interestingly, this face you present to the world may be far different than the inner workings of your Sun sign! The Crystal Zodiac by Judy Hall is an incredibly practical book that explains which gemstones and crystals correlate with each Sun, Moon, and Ascendant placement...and why.
